

SUPRACLEAN M 95

WASHING CHEMICAL PRODUCT DATA SHEET

SUPRACLEAN M 95 is a mixture of organic chemicals. It is formulated to give excellent results in degreasing automobile and other components in various types of degreasing machines.

It is non-toxic, very economical, and easily soluble in water in any proportions as desired by the user. It can be used at normal room temperature and hence there is no need to heat the solution. So the cost of heater and electricity is also saved. It does not attack non - ferrous metals either.

We recommended you to use **SUPRACLEAN M 95** 5% in water i.e. the ratio is 1:20 with water.

PRODUCT SPECIFICATION

NAME OF THE TEST	STANDARD VALUES
Colour	Pink
Odour	Mild Organic Odour
Specific Gravity @ 29.5°C	1.09
Active Matter	32%
pH	9.5 to 11
pH of 5% in water	8.5

SUPRACLEAN M 95 gives excellent corrosion inhibition when mixed with Coroseal 33.

SUPRACLEAN M 95 - D

WASHING CHEMICAL

SUPRACLEAN M 95 - D has been developed for low or high pressure component washing machines of preferably 2 or 3 chamber designs. It can also be used with small batch type machines. Some of its features are given below :

- 1) It is mixed in water in the ratio of 8:100 or at 8%.
- 2) This chemical has very low foaming tendency & thus won't form unsettling foam at any pressure.
- 3) Removed oil does not dissolve in it & can be skimmed off very easily. Thus it does not develop foul smell as well.
- 4) This chemical can be used in hot or cold water and desired results can be achieved irrespective of it. However we recommend you to use it in cold water as there can be slight evaporation of chemical in hot water.
- 5) You can also reduce your monthly electricity bill by using cold water.
- 6) It does not lead to bacterial growth also.
- 7) It gives corrosion prevention for 8 days.
- 8) We have achieved effective corrosion prevention even at a very low pH, so the chemical is very friendly with your operator, won't form any unbearable odour or won't have itching of skin.
- 9) The chemical doesn't attack ferrous or non-ferrous metals, paints, rubber parts, etc.
