

# Neermal<sup>+</sup>

## WIRE-EDM CORROSION INHIBITOR

Neermal<sup>+</sup> - Is highly concentrated corrosion inhibitor specially developed for wire EDM machines to prevent undesirable buildup / saturation or forming or rust on work pieces and continuously help to keep the machine clean.

Neermal<sup>+</sup> is recommended for use in new or existing machine installations. Neermal<sup>+</sup> is added to the de-ionized water equally between the dirty water and clean water tanks. A concentration of 0.5% to 1% Guarantees optimal rust proofing.

Neermal<sup>+</sup> is delivered ready for immediate use. There is no need for special cleaning or preparation of the machine.

## Special Features

- Non-ionic, dose not affect the de-ionizing resin
- Low concentration 0.5% to 1%
- No alteration of conductivity
- No effect on cutting efficiency of the machine
- Helps flushing off of the spark gap so as to improve accuracy
- No influence on steel, Nonferrous heavy material and graphite
- Non toxic, Noo hazardous additive
- Physiologically safe
- Can be removed with water
- Environmentally safe ECO friendly.
